**MEET THE DEALERS:
Dave Humphrey Enterprises, Inc. (DHE)**

Dave Humphrey Enterprises or DHE has been a dealer with CON-E-CO since about 1996. They service the Arizona, California, Hawaii, and Nevada areas. DHE started in the San Francisco Bay area in the 1950's as a multi-plant concrete ready mix producer. They offer a wide variety of services for concrete producers, from new plant layout and design, to supplying overnight parts. DHE sells mobile concrete batching plants, portable concrete batching plants, plant upgrades, and all concrete batching accessories. DHE's customers rely on their industry knowledge and follow-up to get them the right plant parts when they need them. DHE, Inc. is committed to supplying their customers with the highest quality parts at a reasonable price. They maintain a complete parts inventory for the equipment they sell and service.

DHE works on various projects that range from "small footprint, big production" to "dam & bridge projects". One of their larger projects, installed in 2018 for National Ready Mixed Concrete is a 24-Hour sustainable high production concrete batch plant. This project consists of dual CON-E-CO® SLP concrete batch plants and is located in downtown Los Angeles.

DHE does more than just sell concrete plants, beginning in May 2023 DHE, Inc. will donate 1/4% of sales from new Concrete Batch Plants directly to the Chico State CIM program. This is an industry leading effort, and they are pleased to pioneer it. The CIM program is educating the next generation of concrete industry professionals through a dedicated 4-year B.S. program across multiple state universities throughout the U.S. Additionally, by exposing them directly to the industry through internships, industry associations, trade shows, and community service projects; the program has developed a proven system of producing a yearly batch of graduates eager and prepared to fill crucial roles specific to the concrete industry.

By supporting this program, DHE is not just investing in the future of the industry, but also in the success of their customers. Concrete batching is at the heart of every concrete supplier's and producer's organization, and a concrete batch plant is a generational asset. By tying new concrete batch plant sales to support of the program, DHE creates a way for incoming industry professionals to take new forms of pride and ownership in their chosen company.
