DHE Inc. Provides Plant Retrofits and New Installations

PEARSON PORTABLE HOT AND CHILLED WATER SYSTEMS

Pearson Hot and Cold Water systems manufactures portable and stationary systems capable of handling over 2,000 yards of concrete per

day. The hot/cold water tank can be configured for a Pearson Direct Fire heater with a efficiency rating of 96%. The wool insulated tanks are manufactured on steel skids or trailer which provides a quick installation for existing plant retrofits. The portable or stationary chillers use the latest refrigeration systems from Carrier for a high efficient chiller system.

two
new site installations * moisture meters * dust collectors * cement screws and valves * concrete reclaimers

RAPIDmix RCC/CTB Plants and Mixers

RAPIDmix 400C RCC / CTB Plant \$570,000.00 as shown.

Screen Machine Indust. Advantages

1. Structural Strength Extensive gussets and pads utilizing Grade 80 and T-1 Steel.
2. Engines - Plenty of horsepower utilizing CAT, Yanmar and Cummins.
3. Domestic Hydraulic Hoses and Fittings.
4. Dodge, Falk, Rexnord and Browning Bearings and Reducers.
5. Innovation in design.
6. Serviceability All products are engineered for service accessibility.
7. Availability of Parts and Service. Local, Regional, and Factory support.
8. History and Reputation of being in business since 1966.
9. American Made using American Steel.
10. Value - SMI equipment is built for the long term.
